15	Sample deck	17			

The *mark* and the wordmark.

A concentric O that brings a source into focus, with a citation marker at its edge. It stands alone as the mark and opens the wordmark as an enlarged first letter.

PRIMARY WORDMARK

MARK

DO

Keep clear space around the mark equal to the weight of its outer ring.
Render white on near-black, or invert to black on white.

DON'T

Recolor, stretch, rotate, add effects, or resize the mark out of proportion with the word. Monochrome only.

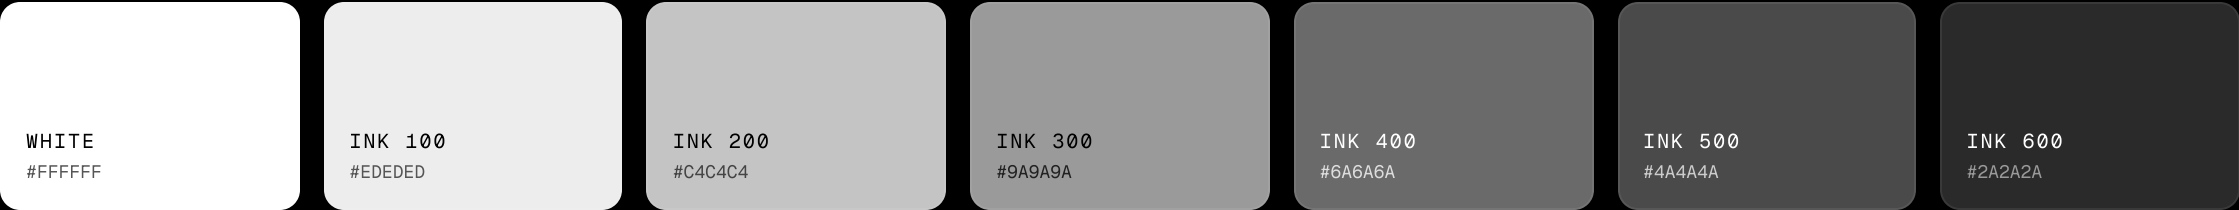

Canvas & surfaces.

The page is pure black. Surfaces step up in small, deliberate near-black increments. Structure reads from hairlines and faint glow, not from big tonal jumps.

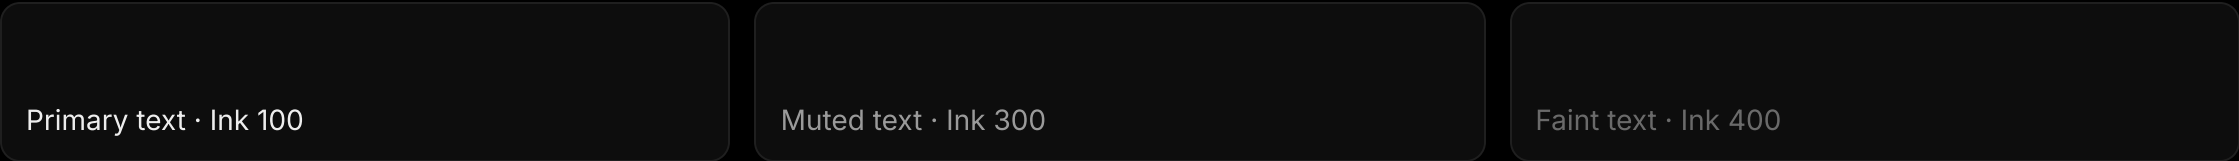

CANVAS #000000 page	RAISED #070707 raised panel	CARD #101010 card	HOVER #161616 card hover	WELL #1E1E1E input well
--	--	--	---	--

The *ink* scale.

White is the only accent. Text steps from white through greys to near-black. Every signal, emphasis, state, hierarchy, is carried by this scale alone.

IN USE

Hairlines & the *glow*.

Hairlines are the primary structural device, white at very low alpha. Depth comes from one soft white radial glow that implies a light source at the origin.

TAGLINES

Be the *source*.
Engineered from *origin*.

PRINCIPLES

- Speak to the reader as "you". Sentence case everywhere.
- Lead with the claim. No filler, no power words.
- One strong number beats five weak ones.

ON BRAND

- YES We get you cited, then we prove it.
- YES Every fix shipped by an engineer. Every citation verified by hand.

NEVER

- NO Em dashes, "it's not X it's Y", "imagine..."
- NO Power words: unlock, supercharge, seamless.
- NO Emoji. Ever.

Business cards.
